BIOMETRIKA

A JOURNAL FOR THE STATISTICAL STUDY OF BIOLOGICAL PROBLEMS

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

EDITED BY

EGON S. PEARSON

IN CONSULTATION WITH

HARALD CRAMÉR — J. B. S. HALDANE

R. C. GEARY — G. M. MORANT

MAJOR GREENWOOD — JOHN WISHART

VOLUME XXXIV

1947

ISSUED BY THE BIOMETRIKA OFFICE
UNIVERSITY COLLEGE, LONDON
AND PRINTED AT THE
UNIVERSITY PRESS, CAMBRIDGE

UNIVERSITY OF UTAH LIBRARIES

First printed in Great Britain at the University Press, Cambridge
Reprinted by offset-litho by Percy Lund Humphries & Co. Ltd

CONTENTS OF VOLUME XXXIV

Memoirs

		PAGES
I.	The variance of the overlap of geometrical figures with reference to a bombing problem. By F. Garwood. With two Figures in the Text	1—17
II.	A study of a first dynasty series of Egyptian skulls from Askkara and of an eleventh dynasty series from Thebes. By A. Batrawi and G. M. Morant. With one Figure in the Text and one Folding Chart	18—27
III.	The generalization of 'Student's' problem when several different population variances are involved. By B. L. Welch.	28—35
IV.	The distribution of Kendall's τ coefficient of rank correlation in rankings containing ties. By G. P. Sillitto. With one Folding Chart	36—40
V.	The use of range in place of standard deviation in the t-test. By E. Lord	41—67
VI.	The frequency distribution of $\sqrt{b_1}$ for samples of all sizes drawn at random from a normal population. By R. C. Geary. With eight Figures in the Text	68—97
VII.	On the computation of universal moments of tests of statistical normality derived from samples drawn at random from a normal universe. Application to the calculation of the seventh moment of b_2. By R. C. Geary and J. P. G. Worlledge	98—110
VIII.	The asymptotical distribution of range in samples from a normal population. By G. Elfving. With two Figures in the Text	111—119
IX.	Limits of the ratio of mean range to standard deviation. By R. L. Plackett	120—122
X.	Significance tests for 2×2 tables. By G. A. Barnard. With two Figures in the Text	123—138
XI.	The choice of statistical tests illustrated on the interpretation of data classed in a 2×2 table. By E. S. Pearson	139—167
XII.	2×2 tables. A note on E. S. Pearson's paper. By G. A. Barnard	168—169
XIII.	The cumulants of the z and of the logarithmic χ^2 and t distributions. By J. Wishart	170—178
XIV.	The meaning of a significance level. By G. A. Barnard	179—182
XV.	On the distribution of the rank correlation coefficient τ when the variates are not independent. By W. Höffding	183—196
XVI.	The significance of rank correlations where parental correlation exists. By H. E. Daniels and M. G. Kendall	197—208
XVII.	Testing for normality. By R. C. Geary	209—242

PAGES

XVIII. The stratified semi-stationary population. By S. VAJDA . . 243—254

XIX. A simple approach to COLfounding and fractional replication in factorial experiments. By O. KEMPTHORNE . . . . . 255—272

XX. A comparison of stratified with unrestricted random sampling from a finite population. By P. ARMITAGE. With four Figures in the Text . . . . . 273—280

XXI. Some theorems on time series. I. By P. A. P. MORAN . . . 281—291

XXII. Rank correlation between two variables, one of which is ranked, the other dichotomous. By J. W. WHITFIELD . . . . . 292—296

XXIII. The variance of τ when both rankings contain ties. By M. G. KENDALL . . . . . 297—298

XXIV. A χ^2 'smooth' test for goodness of fit. By F. N. DAVID . . . 299—310

XXV. An exact test for the equality of variances. By R. L. PLACKETT . 311—319

XXVI. The estimation from individual records of the relationship between dose and quantal response. By D. J. FINNEY. With four Figures in the Text . . . . . 320—334

XXVII. A power function for tests of randomness in a sequence of alternatives. By F. N. DAVID. With one Figure in the Text . . 335—339

XXVIII. A numerical solution of the problem of moments. By H. O. HARTLEY and S. H. KHAMIS . . . . . 340—351

XXIX. Approximation to percentage points of the z-distribution. By A. H. CARTER . . . . . 352—358

Miscellanea

PAGES

(i) Note on the cumulants of Fisher's z-distribution. By L. A. AROIAN . 359—360

(ii) A note on the mean deviation from the median. By K. R. NAIR. . 360—362

(iii) On the method of paired comparisons. By P. A. P. MORAN. . . 363—365

(iv) Notes on the calculation of autocorrelations of linear autoregressive schemes. By M. H. QUENOUILLE . . . . . 365—367

(v) Approximate formulae for the percentage points of the incomplete beta function and of the χ^2 distribution. By D. HALTON THOMSON . . 368—372

(vi) Review of C. E. WEATHERBURN'S *A First Course in Mathematical Statistics*. By F. N. DAVID 373

(vii) Review of *Advances in Genetics*, Vol. 1, Academic Press, New York. By J. B. S. HALDANE 373

(viii) Review of H. CRAMÉR'S *Mathematical Methods of Statistics*. By F. N. DAVID 374
